CRANE MATS

A fully integrated matting solution with the offer of new and used mats along with first-rate service. We handle the coordination of all project transport logistics and have the flexibility to meet any project need.

FOR HEAVY EQUIPMENT IN HARSH TERRAIN

Trans Canada Forest Products mats can be used in a variety of matting applications including pipelines, construction, transmission lines, well-sites and environmental remediation. Our mats are designed with bolts and cable options to make maneuvering and lifting easy.

These industrial mats are very durable and can stabilize heavy duty equipment in the harshest of conditions.

FEATURES

- Any custom sizes available for purchase
- Cables, machining, and treating options available upon request
- 3/4" high tensile industrial cable with high strength crimp connectors
- Solid, durable and compression-resistant
